**Time** 9:00 – 12:30

**Overview**  
Matt and Narelle are both registered counsellors and both former service workers with Policing and Military backgrounds. The workshop is aimed at two key areas 'Understanding Mental Health' and 'Self Care and Resilience'.

The first part of the day will be information in relation to the spectrum of mental health, common mental health challenges and a discussion around risk and protective factors. Importantly, they will also discuss signs and symptoms, and available supports and treatments.

The second part of the day will be a focus on understanding what self-care and resilience is, with the knowledge that both terms are often over-used. We will discuss the relationship between the two and how an awareness of individualised self-care supports an individuals' resilience.
