

Cat Tracker

Understanding pet cats through citizen science

Dr Philip Roetman, UniSA's Discovery Circle
www.discoverycircle.org.au

What is **Citizen Science**?

Professional researchers engage the public to collect or analyse data within a cooperative framework of research and education

What is **Citizen Science**?

Professional researchers engage the public to collect or analyse data within a cooperative framework of research and education

3 examples of **citizen science**

1. **Christmas Bird Count**

27 observers to 70,000+ (LeBaron 2007, 2013)

2. **CoCoRaHS** (Community Collaborative Rain, Hail, and Snow Network)

7,500 precipitation reports a day

(Cifelli et al. 2005)

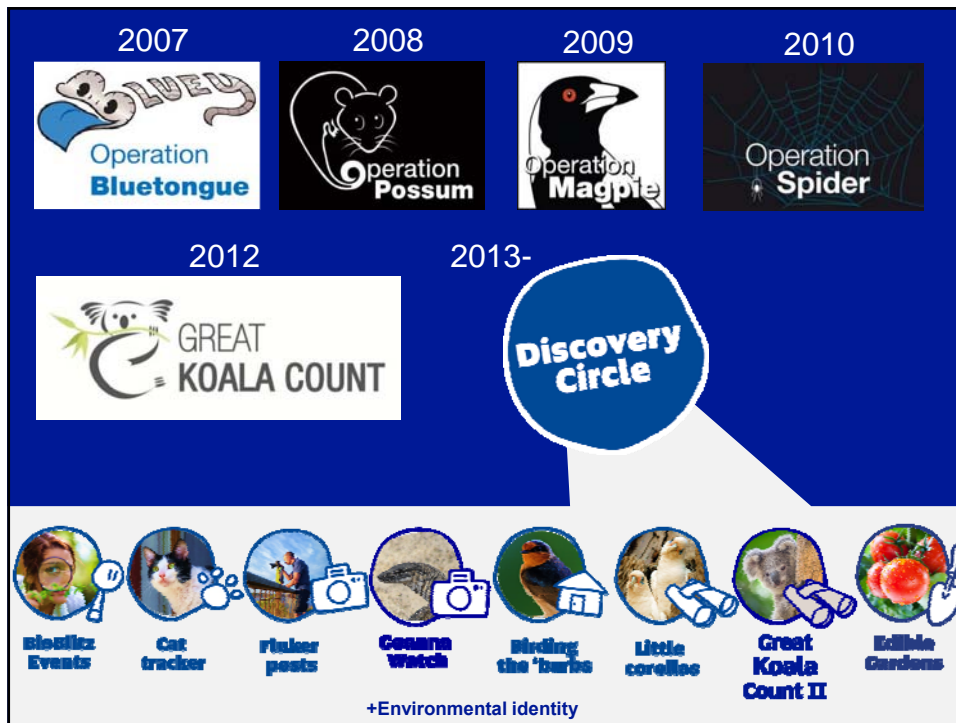

3. **Galaxy Zoo**

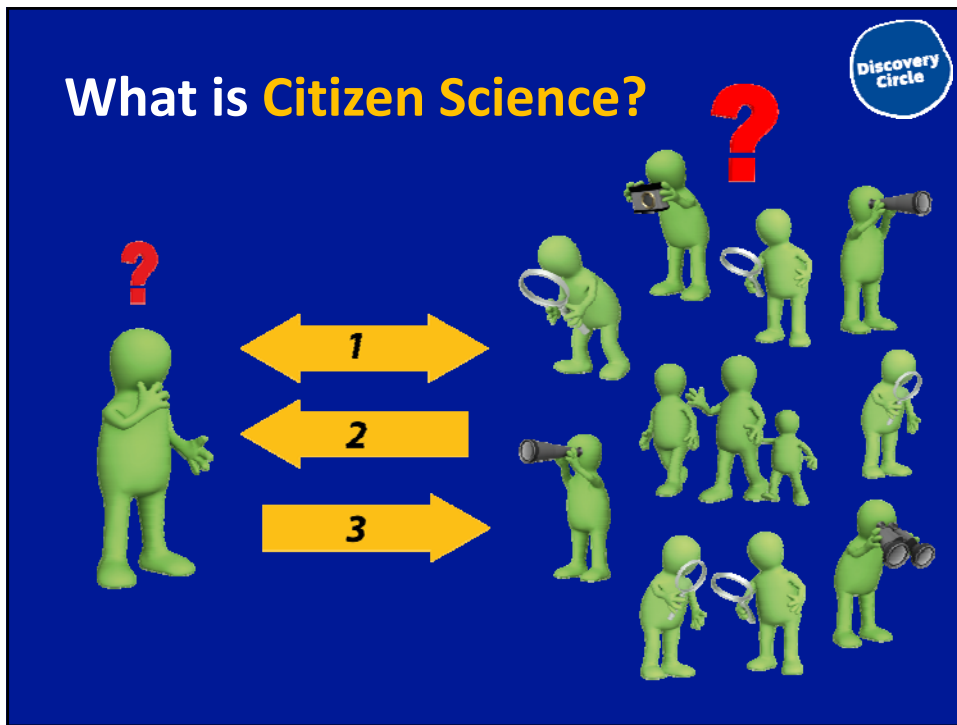

1 million+ participants

100 million+ galaxies classified

(Raddick et al. 2009b; Lintott et al. 2010)

Why Cat Tracker?

- **Need large sample:**
 - Cat movement (9% in parks?)
 - Social survey
- **Impact:**
 - Informed management
 - Engaging cat owners
 - Demonstrating cat range

The Cat Tracker team

Discovery Circle Partners:

- University of South Australia
- Department of Environment, Water and Natural Resources
- Adelaide and Mount Lofty Ranges Natural Resources Management Board
- City of Marion
- City of Salisbury

Local Cat Tracker Project Partners

- Dog and Cat Management Board
- City of Mitcham

International Project Partners:

- North Carolina State University
- North Carolina Natural History Museum
- Victoria University of Wellington

Project team:

- Thousands of Citizen Scientists
- Philip Roetman, Carla Litchfield, Hayley Tindle, Gillian Quinton, Belinda Chiera
- Education team: Kathy Paige, David Lloyd, Yvonne Zeegers
- Partner organisation contributors: UniSA marketing team, David Chan

Cat Tracker: **two** areas of research

- Tracking data
 - 428 cats tracked
- Social survey
 - 3,192 respondents
 - 4,314 cats
 - Cat management actions
 - Cat management views
 - Personality tests
 - Stories

Cat tracks

Cats that have been tracked as part of the Cat Tracker project in Australia are displayed below.

Click on 'View Track' under each cat photograph to see the cat's movement... you will need to wait a moment for the data to load.

Find out more about the project and how to participate: [click here](#).

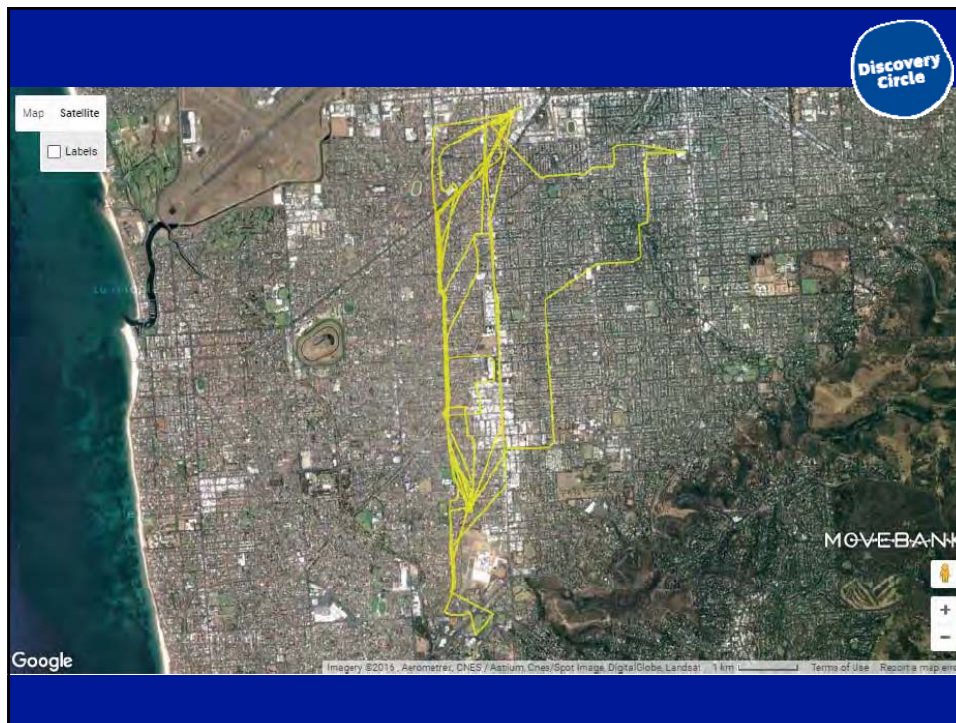

The cat tracks and photographs published as part of the Cat Tracker project are subject to copyright. If you would like to reproduce any of the images or information, please contact us at the [Discovery Circle](#).

Cat Tracker: tracking data

- 61,250 location data points
- Median home-range: 1 ha
- Largest home range: 31.1 ha
- Smallest home range: 0.1ha

Cat Tracker: **tracking** data

- 88% had larger home-ranges at night
- Wandering cats typically:
 - more road crossings
 - more signs of being in fights
 - more seen with prey
 - less time inside
- Clandestine cats (39%!!!!)

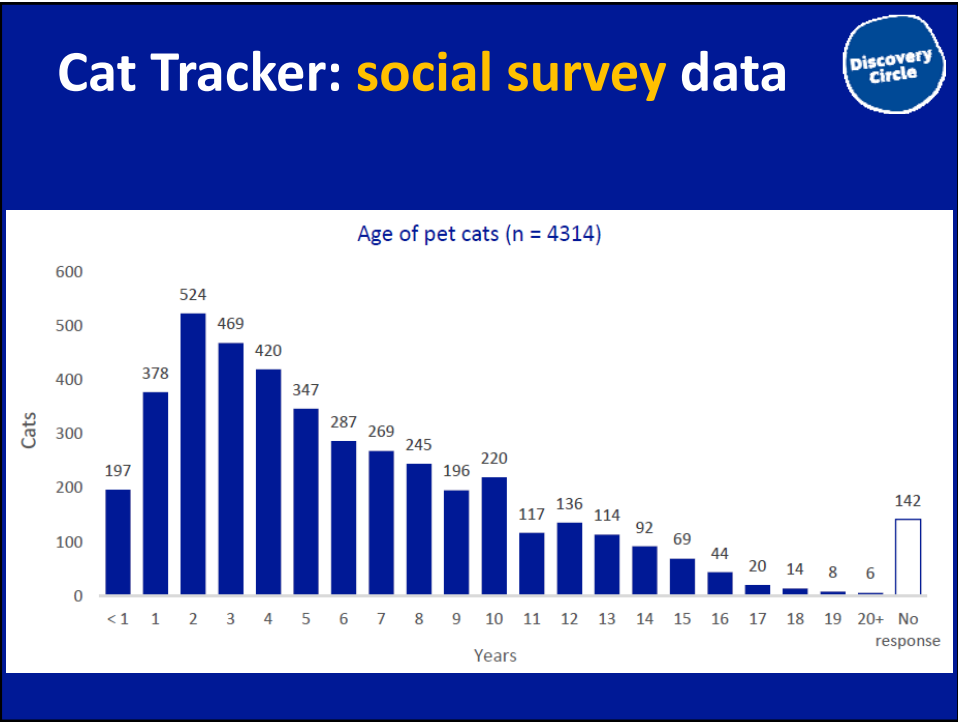

Cat Tracker: social survey data

Top 25 male cat names	
Cat name	Frequency (number of cats)
1. Charlie	31
2. Max	29
3. Harry	24
4. Oscar	23
5. Toby	21
6. Jasper	20
7. Milo	20
8. Leo	17
9. Tiger	17
10. Basil	15
11. George	15
12. Simba	14
13. Oliver	13
14. Archie	12
15. Felix	11
16. Henry	11
17. Ollie	11
18. Jack	10
19. Sylvester	10
20. Tigger	10
21. Tom	10
22. Billy	9
23. Merlin	9
24. Alfie	8
25. Cooper	8

Top 25 female cat names	
Cat name	Frequency (number of cats)
1. Bella	39
2. Lucy	27
3. Missy	22
4. Molly	22
5. Lily	21
6. Coco	20
7. Luna	19
8. Daisy	16
9. Millie	15
10. Misty	15
11. Poppy	15
12. Lola	14
13. Kitty	13
14. Mia	13
15. Milly	13
16. Ruby	13
17. Bonnie	12
18. Holly	12
19. Lilly	12
20. Lulu	12
21. Maggie	12
22. Tilly	12
23. Rosie	11
24. Cleo	10
25. Willow	10

Less common names: Asteroid, Bruce Willis Pussington, Harry Barry White Pants, Mr Hamish the Extraordinary Puss, Smallbum, Velcro George

Cat Tracker: **social survey** data

79% of cats allowed outdoors

20% indoor only cats

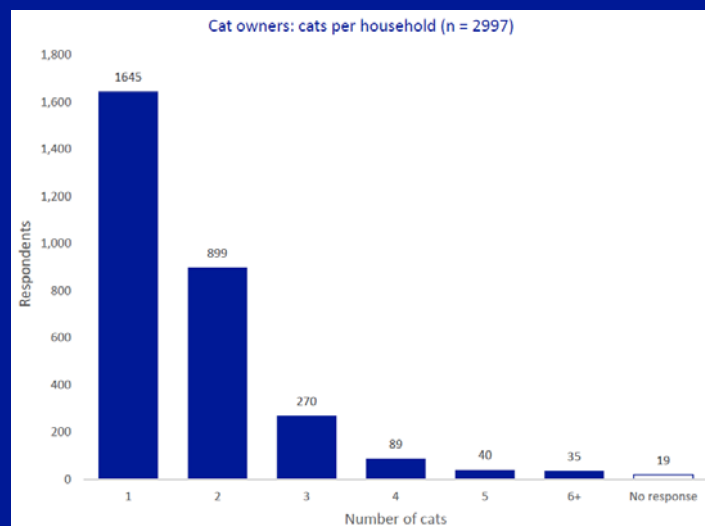

Cat Tracker: social survey data

	Wormed (n = 4,269)	Flea treated (n = 4,262)	Vaccinated (n = 4,251)	Checked by a vet (n = 4,243)
Yes	76.8%	77.3%	71.4%	72.1%
No	19.6%	20.0%	23.6%	24.2%
Unsure	2.6%	1.6%	3.5%	2.1%
No response	1.0%	1.2%	1.5%	1.6%

≈ 3/4 provided regular health treatments

Cat Tracker: social survey data

Average = 1.5

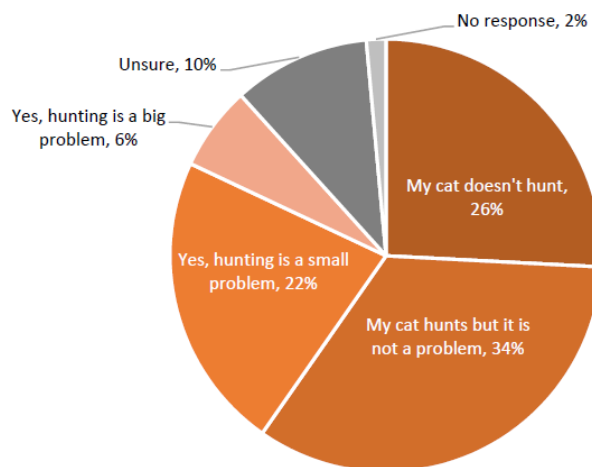

Meet the owners...

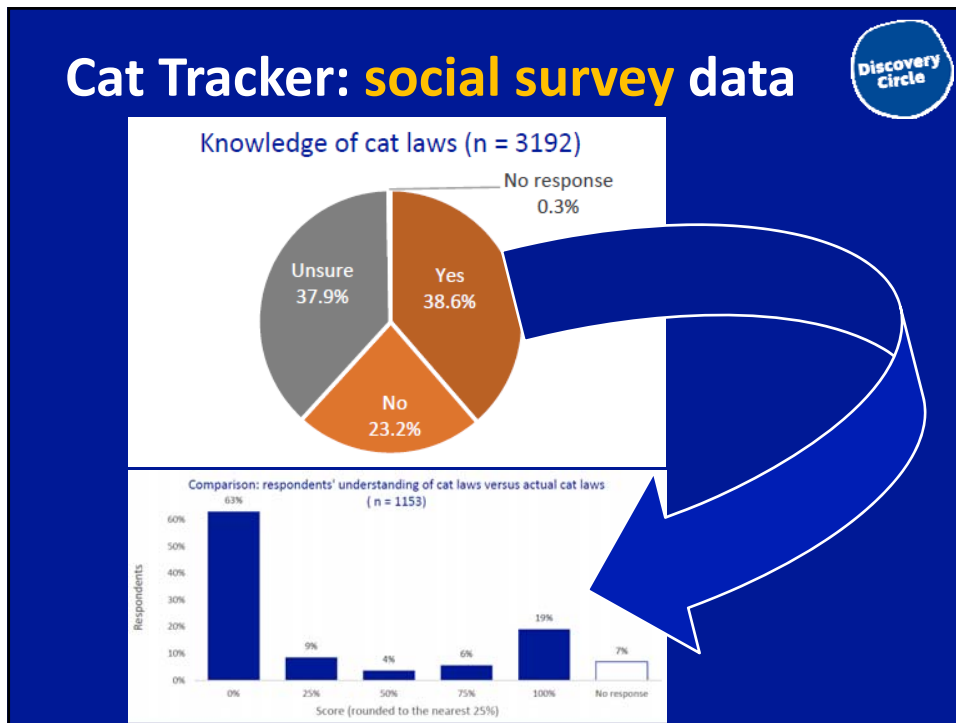

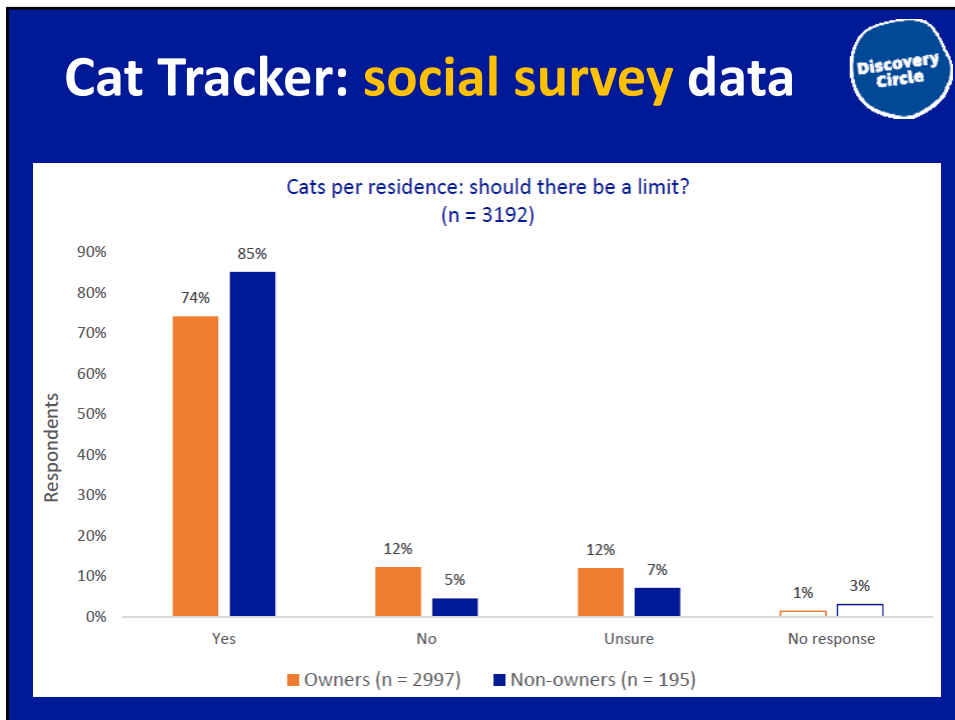

Cat Tracker: social survey data

Is your cat's hunting a problem? (n = 4314)

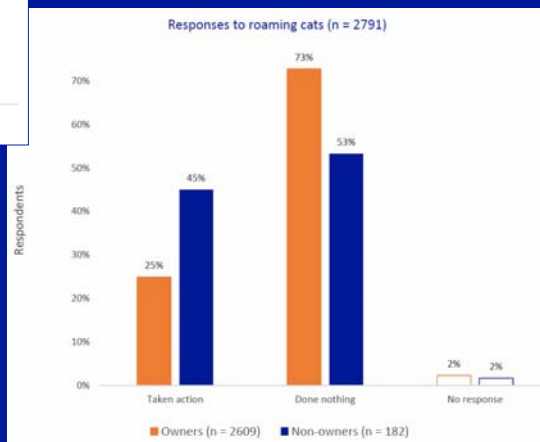

Cat Tracker: social survey data

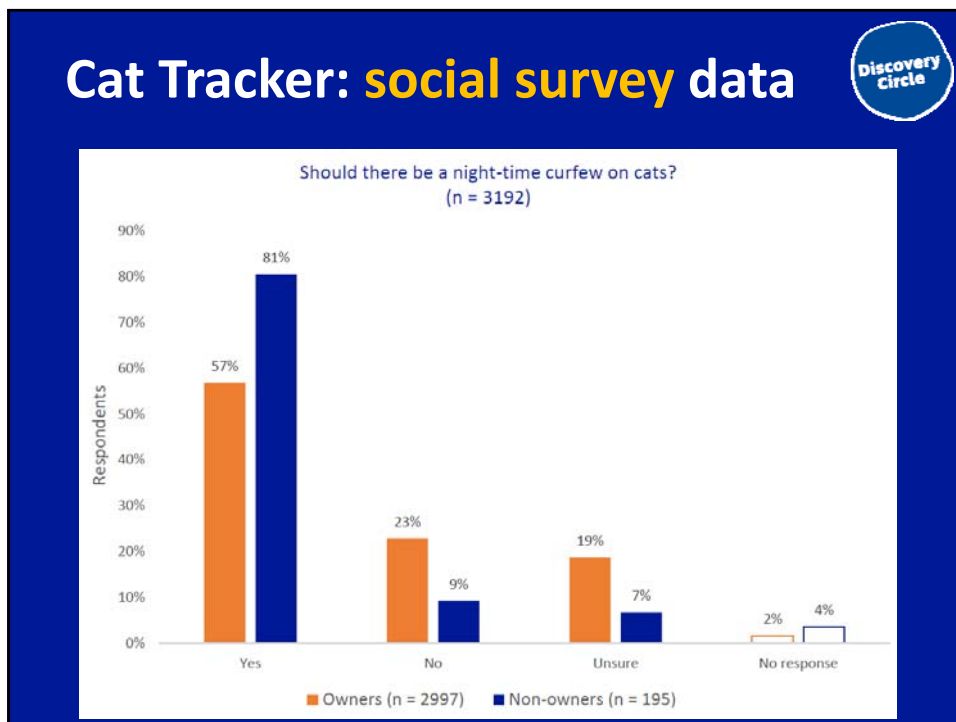

Cat owner median = 3*
Non-owners median = 2*

Cat Tracker: social survey data

Cat Tracker: social survey data

The feline five:

- Similarity of indoor and outdoor cats
- Only significant difference = indoor slightly more *friendly*

Cat Tracker: **evaluation survey**

Learning:

- 71% reported learning
- For respondents whose cats were tracked:
 - 46% - cats went further than expected
 - 71% - something surprising or interesting
 - 31% location
 - 24% distance
 - 16% roads or railways
 - 13% travel (e.g. routes)

Cat Tracker: **evaluation survey**

Learning:

“How far the range actually is. It was good to see how they actually cross roads and get into paddocks/etc. How much danger they're actually exposed to.”

“The surprising distance travelled on the odd occasion but also the regularity of his tracks”

“That people have crazy names for their cats!”

Cat Tracker: **evaluation survey**

Attitude change:

- **Importance of keeping cats indoors during the day** (n = 332 same people)
Pre: 24% ⇒ Post: 56% (131% increase)
- **Just people with tracked cats** (n = 114 same people)
Pre: 9% ⇒ Post: 45% (410% increase)

Cat Tracker: **evaluation survey**

Attitude change:

- **Importance of keeping cats indoors at night** (n = 351 same people)

Pre: 74% ⇒ Post: 86% (17% increase)

“...I also spoke to our neighbours about trying to keep their cats in at night and they are doing the same thing.”

Cat Tracker: **evaluation survey**

Behaviour change:

- Tracked cats: 27%
- Non-tracked cats: 12%
- 69% - cat indoors more:
 - Earlier at night 21%
 - Inside more 19%
 - Contained at night 16%
 - Now completely contained 12%

“We ensure that he is confined inside at night now and only allow him outside during the day.”

Cat Tracker: **evaluation survey**

Behaviour change:

- What if you got a new cat?
- 36% would manage the cat differently:
 - 79% indoors more (29% indoors only)
 - 11% wouldn't get another cat
 - 10% other

*“Would not get a cat in future
(because of the results)”*

Cat Tracker: **evaluation survey**

“I hope to see further tests of this nature able to be funded. Understanding the cats instead of just 'fist shaking' at them is to everyone's benefit.”

“This study has provided some real evidence on the movements of pet cats, something which has been lacking in any discussion of the domestic cat population.”

Where to **next**?

- **National project?**
 - Sign up!
 - Nation-wide tracking and social survey
 - Analysis of cat diet?
 - Diet diaries
 - Isotope analysis of cat hair
- **Tracking semi-owned cats?**
 - Utilising current participants
 - New technology
